

Business Dashboard — Life Sciences

DAX Formula Reference | Power BI | By Yogesh Gadekar (YSG)

Table Name: LifeScience_Sales	Dataset: 1,000 Rows · 29 Columns	Currency: INR (₹)	Period: 2022 – 2024
---	---	--------------------------	----------------------------

Revenue KPIs

01

Total Revenue

Total Revenue =
`SUM(LifeScience_Sales[Net_Revenue_INR])`

Sums all net revenue after discount.

02

Total Profit

Total Profit =
`SUM(LifeScience_Sales[Gross_Profit_INR])`

Sums gross profit across all records.

03

Gross Margin %

Gross Margin % =
`DIVIDE([Total Profit], [Total Revenue], 0) * 100`

Uses DIVIDE to avoid divide-by-zero error.

04

Total Units Sold

Total Units Sold =
`SUM(LifeScience_Sales[Units_Sold])`

Total quantity of units sold.

05

Avg Discount %

Avg Discount % =
`AVERAGE(LifeScience_Sales[Discount_Pct]) * 100`

Average discount percentage across all transactions.

Clinical KPIs

06

Total Patients

Total Patients =
`SUM(LifeScience_Sales[Patient_Count])`

Total number of patients served.

07

Compliance Rate %

Compliance Rate % =
`AVERAGE(LifeScience_Sales[Compliance_Rate_Pct])`

Average patient medication compliance rate.

Spend & Growth

08

Total RnD Spend

Total RnD Spend =
`SUM(LifeScience_Sales[RnD_Spend_INR])`

Total research and development expenditure.

09

YoY Growth %

YoY Growth % =
`DIVIDE(
 [Total Revenue] - CALCULATE([Total Revenue],
 DATEADD(LifeScience_Sales[Sale_Date], -1, YEAR)),
 CALCULATE([Total Revenue],
 DATEADD(LifeScience_Sales[Sale_Date], -1, YEAR)),
 BLANK()
) * 100`

Year-over-Year revenue growth. Shows BLANK if no prior year data.

10

Revenue by Region %

Revenue by Region % =
`DIVIDE(
 [Total Revenue],
 CALCULATE([Total Revenue],
 ALL(LifeScience_Sales[Region])),
 0
) * 100`

Each region's % share of total revenue. ALL() removes region filter.

How to Add Measures in Power BI

Step 1	Open Power BI Desktop and load lifescience_india_dataset.csv via Home > Get Data > Text/CSV
Step 2	Click on the LifeScience_Sales table in the Fields pane on the right
Step 3	Go to Home > New Measure (or right-click table > New Measure)
Step 4	Paste the DAX formula and press Enter
Step 5	Repeat Steps 3-4 for all 10 measures — they will show with a calculator icon
